By Kambe Tsutomu : Geometrical Theory of Dynamical Systems and Fluid Flows (Advanced Series in Nonlinear Dynamics) mechanical and aerospace engineering mae undergraduate program graduate program faculty

all courses faculty listings and curricular and degree phys 13100 mechanics 100 units topics include particle motion newtons laws work and energy systems of particles rigid body motion gravitation oscillations Geometrical Theory of Dynamical Systems and Fluid Flows (Advanced Series in Nonlinear Dynamics):

This is an introductory textbook on the geometrical theory of dynamical systems fluid flows and certain integrable systems The topics are interdisciplinary and extend from mathematics mechanics and physics to mechanical engineering and the approach is very fundamental The main theme of this book is a unified formulation to understand dynamical evolutions of physical systems within mathematical ideas of Riemannian geometry and Lie groups by using well known examples The book is very interesting and offers a broad spectrum of concepts oscillating among pure mathematics theoretical physics and natural sciences It can be recommended to graduate and PhD students as well as to all researchers seeking solutions to their
