By Stefan P Ivanov : Extremals for the Sobolev Inequality and the Quaternionic Contact Yamabe Problem Extremals for the Sobolev Inequality and the Quaternionic Contact Yamabe Problem: The aim of this book is to give an account of some important new developments in the study of the Yamabe problem on quaternionic contact manifolds This book covers the conformally flat case of the quaternionic Heisenberg group or sphere where complete and detailed proofs are given together with a chapter on the conformal curvature tensor introduced very recently by the authors The starting point of the considered problems is the well known Folland Stein Sobolev type From the Inside Flap The aim of this book is to give an account of some important new developments in the study of the Yamabe problem on quaternionic contact manifolds This book covers the conformally flat case of the quaternionic Heisenberg group or sphere wh
