By Jozsef Szilasi, Rezso L Lovas, David Cs Kertesz : Connections, Sprays and Finsler Structures Connections, Sprays and Finsler Structures:

This book provides a comprehensive introduction to Finsler geometry in the language of present day mathematics Through Finsler geometry it also introduces the reader to other structures and techniques of differential geometry

Prerequisites for reading the book are minimal undergraduate linear algebra over the reals and analysis The necessary concepts and tools of advanced linear algebra over modules point set topology multivariable calculus and the rudimen This book requires only knowledge of undergraduate algebra and analysis The authors present the essentials of Finsler geometry not only the rudiments The text differs from other books in that it is organized in such a way that a course of advanced calcu
