By Hua Chen : Emerging Topics on Differential Equations and Their Applications (Nankai Series in Pure,

Applied Mathematics and Theoretical Physics) jul 08 2017nbsp; on emerging topics on differential equations in differential equations and their applications nankai series in pure applied mathematics emerging topics on differential equations and their applications proceedings on sino japan conference of young mathematicians on emerging topics on differential Emerging Topics on Differential Equations and Their Applications (Nankai Series in Pure, Applied Mathematics and Theoretical Physics):

The aim of the Sino Japan Conference of Young Mathematicians was to provide a forum for presenting and discussing recent trends and developments in differential equations and their applications as well as to promote scientific exchanges and collaborations among young mathematicians both from China and Japan The topics discussed in this proceedings include mean curvature flows KAM theory N body problems flows on Riemannian manifolds hyperbolic systems vortices From the Inside Flap The aim of the Sino Japan Conference of Young Mathematicians was to provide a forum for presenting and discussing recent trends and developments in differential equations and their applications as well as to promote scientific exchanges and
