By Bang-Yen Chen : Total Mean Curvature and Submanifolds of Finite Type (Series in Pure Mathematics)

buy total mean curvature and submanifolds of finite type series in pure mathematics on amazon free shipping on qualified orders series in pure mathematics volume i total mean curvature and submanifolds of finite type bang yen chen Total Mean Curvature and Submanifolds of Finite Type (Series in Pure Mathematics):

The purpose of this book is to introduce the reader to two interesting topics in geometry which have developed over the last fifteen years namely total mean curvature and submanifolds of finite type The theory of total mean curvature is the study of the integral of the n th power of the mean curvature of a compact n dimensional submanifold in a Euclidean m space and its applications to other branches of mathematics The relation of total mean curvature to analysis ge offers a first well organised presentation of submanifolds of finite type with some applications Bull of the London Maths Soc 17 From the Inside Flap The purpose of this book is to introduce the reader to two i
