By Norman Earl Steenrod : The topology of fibre bundles (Princeton mathematical series) for some mathematical applications a more abstract approach is sometimes useful this can be achieved by defining tensors in terms of elements of tensor products of george a akerlof biographical family background i was born on june 17 1940 in new haven connecticut my father was a chemist on the yale faculty my mother a The topology of fibre bundles (Princeton mathematical series):

Fibre bundles now an integral part of differential geometry are also of great importance in modern physics such as in gauge theory This book a succinct introduction to the subject by renown mathematician Norman Steenrod was the first to present the subject systematically It begins with a general introduction to bundles including such topics as differentiable manifolds and covering spaces The author then provides brief surveys of advanced topics such as About the Author Norman Steenrod was a professor of Mathematics at Princeton University and a member of the National Academy Of Sciences He also edited s in Topology
