By Ernest Julius Wilczynski : Projective Differential Geometry of Curves and Ruled Surfaces the klein bottle is a closed nonorientable surface of euler characteristic dodson and parker 1997 p 125 that has no inside or outside originally described by the mbius strip also called the twisted cylinder henle 1994 p 110 is a one sided nonorientable surface obtained by cutting a closed band into a single strip Projective Differential Geometry of Curves and Ruled Surfaces:

This book was originally published prior to 1923 and represents a reproduction of an important historical work maintaining the same format as the original work While some publishers have opted to apply OCR optical character

recognition technology to the process we believe this leads to sub optimal results frequent typographical errors strange characters and confusing formatting and does not adequately preserve the historical character of the original artifact W
