From Cambridge University Press : Spectral Theory and Geometry (London Mathematical Society Lecture Note Series) our mission is to further the interests of mathematical research scholarship and education known for ade classification arnolds cat map arnold conjecture arnold diffusion arnold invariants arnolds rouble problem arnolds spectral sequence Spectral Theory and Geometry (London Mathematical Society Lecture Note Series):

This volume brings together lectures from an instructional meeting on spectral theory and geometry held under the auspices of the International Centre for Mathematical Sciences in Edinburgh The contributions here come from world experts and many are much expanded versions of the lectures they gave Together they survey the core material and go beyond to reach deeper results For graduate students and experts alike this book will be a highly useful resource The book provides an excellent overview of the relation between the spectral theory of partial differential operators and the geometry of the underlying manifolds Dmitri Vassiliev Bulletin of the London Mathematical Society For graduate student
